

Press Release

Master Dental Care Introduces AlignMaster, the Maldives' First Locally Developed Clear Aligner

1. **Maldives — 8 October 2026** — Master Dental Care introduced **AlignMaster**, the Maldives' first clear aligner developed and produced locally in the country, at an event held on Thursday, 8 October 2026, at **Dental Studio, Hulhumalé**.
2. Developed and manufactured through Master Dental Care's **in-house dental laboratory**, AlignMaster brings together dental expertise and advanced dental technology. The production facility is equipped with advanced machinery, including **heat-pressing equipment, an intraoral scanner and specialised digital software** used throughout the aligner planning and production process.
3. The treatment is supported by **experienced orthodontists and skilled dental technicians**, with each patient assessed by a dental specialist to determine whether clear-aligner treatment is appropriate for their individual needs.
4. Local production also provides **faster access with less waiting**, reducing the delays associated with overseas production and shipping. AlignMaster was developed with the aim of making clear-aligner treatment **more accessible and affordable** for suitable patients in the Maldives.
5. The introduction of **AlignMaster** marked another milestone in **Master Dental Care's 15 years of dental excellence**, reflecting the organisation's continued investment in advanced technology and modern dental care.

Managing Director of Master Dental Care, Dr. Ahmed Saleem, stated:

"The primary objective behind the development of AlignMaster is to provide patients seeking clear-aligner treatment with faster access, greater convenience and a more affordable option. The introduction of AlignMaster is a significant milestone in our 15-year journey and demonstrates our continued commitment to investing in technology and advancing modern dental care in the Maldives.

As the Maldives' first Smile Architect, I am proud to introduce AlignMaster as a locally developed brand, **"Transforming Smiles, Right Here in the Maldives."**
